# Services.

## From outage management, project execution to labour and tooling resource hire, PGSR is equipped to do it all.

Our expert teams of project managers, quality and safety managers, schedulers, field supervisors, and trades labour provide complete turnkey services for maintenance, repairs, retrofits, and new installation projects and outage works.

### Our Approach

We understand that a one-size-fits-all approach does not work for every project — so we offer flexible solutions to our customers depending on their specific requirements

### Solutions-Oriented

From total project execution to labour and/or tooling hire. Our services encompassing supervision, skilled personnel resources, tooling and equipment hire for scheduled, unscheduled and emergency outages. Our management, supervisors and workforce have an extensive and broad range of experience covering:

- Precision works on turbines and generators for Steam, Gas, Hydro & Wind Plants. Major Overhauls, Inspections, Re-blading, Re-winds and re-wedging.
- Balance of plant - Valves, Governors, SFPT's, Pumps, Actuators, Compressors and much more.....
- Large scale processing factory maintenance
- Shutdowns and Outage works. General fabrication and construction works.
- Electrical installations, maintaining and servicing of generation assets, HV switchyards, transformers and switchboards.
- Industrial Boiler repair and maintenance.
- Specialised Pressure Welding

### Expert Teams - In-house and Nation wide

Our specialist teams can overhaul, repair, and provide turnkey installation services, and have extensive experience covering a range of precision works. PGSR is well-known for our superior skilled resource recruitment and onboarding. Working with PGSR you can access not only our in-house team of specialists, but our large network of specialists across mechanical, electrical, boilermakers, fabricators, trades, riggers, crane drivers, and labour, Australia-wide.

### Backed by a World-Class Name

Since 2014, PGSR has become a wholly-owned subsidiary of Toshiba Energy Systems. Since then, PGSR has remained an independent, sustainable business, and the backing by Toshiba uniquely places us to provide a complete range of energy and industry services depending on individual customers' requirements. PGSR are supported and backed with Toshiba engineering resources, systems and process.

## Our Services

At PGSR, we run the full range of service solutions — so no matter your job or industry requirements, we can scale meet your requirements.

### Skilled and qualified resources field services

PGSR provides a comprehensive range of turnkey maintenance, repair, and overhaul services of industrial equipment in the field. Our tooling, machining and specialised equipment is containerised ready to transport.

### Skilled personnel resourcing

We provide large scale work crews for major outage or installations that take the pressure off internal skills shortages and for ongoing planned maintenance. We Mobilise, Accommodate, Assist with Performance Management, provide Payroll and Demobilise the crew on your behalf.

### Modern Tooling & Specialised equipment

Our industry-leading specialised equipment ensures flexible and adaptable solutions for every project. Our tooling provisioned containers are completely customisable to suit your project's needs.

### Breakdown services

Our suite of breakdown services means specialists and specialised equipment can go anywhere at anytime.

### Turnkey project services

Our turnkey and on-time maintenance and repairs solutions are delivered with tailor-made project management and scheduling solutions.

### Workshop Facilities

Our newly built state-of-the-art workshop facility ensures your off-site repairs are handled with efficiency and precision covering all aspects of the project.

### Specialised Pressure Welding & Fabrication

Welding and Fabrication services are focused on but not limited to:

- Boiler Tube welding
- Pressure vessels
- Heat exchangers
- Pipe spooling
- General fabrication & Maintenance services - shop or site
